

# Professional Licensure or Certification Disclosure

## Electroneurodiagnostic (END) Technologist

*This disclosure is being made in compliance with federal regulation 34 CFR §668.43*

Midwestern Career College's Electroneurodiagnostic (END) Technologist program is recognized by the American Board of Registration of Electroencephalographic and Evoked Potential Technologists (ABRET) and provides eligibility to sit for ABRET Electroencephalographic (EEG) exam after completion of the program and the minimum of 100 documented EEG cases.

Students can read about EEG Exam Eligibility requirements here:

<https://www.abret.org/candidates/credentials/eeg/>. Click on "Have you completed an ABRET Recognized NDT Program" drop down menu to see MCC program listing on ABRET website.

- ✓ Midwestern Career College (MCC) has determined that the curriculum of MCC's Electroneurodiagnostic (END) Technologist program meets the state educational requirements for licensure or certification for Registered EEG Technologists in the following states: Illinois, Indiana, Wisconsin.
- ✓ MCC was unable to determine if completion of MCC's Electroneurodiagnostic (END) Technologist program meets the state educational requirements for licensure or certification for Registered EEG Technologists in other 47 states and the U.S. territories.

While the States of Illinois, Indiana, and Wisconsin do not require EEG Technologist to have a license in order to work in the state, professional certification through ABRET is preferred or may be required by the employer.

Please be aware that there may be additional professional licensure or certification requirements like professional examinations, continuing education, background checks, years of work experience, fingerprinting requirements, etc. which are not covered by academic program's curriculum. Additional requirements may differ by state. Current and prospective students are strongly encouraged to contact the appropriate licensing or credentialing agency for their location or the state at which they desire to be licensed or certified to seek information and additional guidance.

Midwestern Career College strives to ensure that the information provided on this page is accurate and up to date. However, as professional licensure and certification requirements are subject to change at any time, students are strongly encouraged to regularly check with the certification boards and other credentialing agencies to confirm professional licensure and certification requirements for their program of study.

For more information, please contact Mehran Jalili, B.S., R. EEG T., R. EP T., END Lead Instructor, [mjalili@mccollege.edu](mailto:mjalili@mccollege.edu).
